

FRONT-COMMERCE FACT SHEET

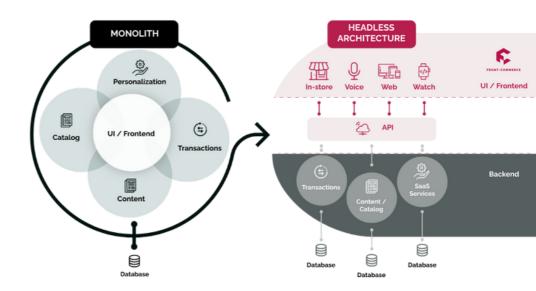

AGILITY & INNOVATION ARE INSEPARABLE

In 2025, 73% of online sales will take place on mobile. Retail is moving fast. Owning an agile business that's technically ready to adapt at scale has never been more important.

Headless Commerce is a flexible e-commerce architecture where the frontend and backend are separated so they can function independently from one another.

The advantages for your business:

- Limitless frontend development potential
- Optimal customer experience
- Reduce long-term costs
- Faster time to market
- An agile e-commerce platform

Front-Commerce is the only digital storefront that improves the customer, merchant & developer experience, at the same time.

An ultra-fast front-end based on PWA & MACH standards, we help brands evolve their current e-commerce platform to a headless commerce approach by integrating the back-end of their choice with Front-Commerce's best of breed technical stack based on React, NodeJS & GraphQL.

Improved business results

Conversion rate

Organic traffic

Lighthouse score

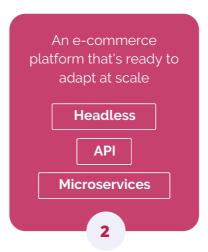

"The results obtained are beyond our expectations and we know that there is still room to go further, especially on mobile."

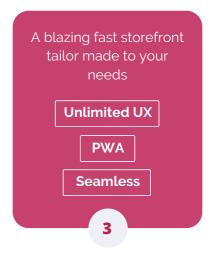

– Benjamin Braillon Omnichannel Manager, Devialet
